

# Reviews & Testimonials

"If you don't have an uninterruptible power supply (UPS) for your critical servers, get one now . . . Tripp Lite offers cheap insurance for times when power stops and your users couldn't otherwise do their jobs." (May 5, 1998 - *PC Magazine* Reviewing Tripp Lite UPS Systems)

"Two things make the Internet Office UPS unique. First, it's one of the few UPS devices in its class that can provide battery backup to laser printers. Second, it offers an intelligent sideways outlet design, accommodating up to four bulky AC transformers . . . it's another rock-solid offering from Tripp Lite." (August, 1997 - *Computer Shopper* Reviewing Internet Office UPS Systems)

"The Smart 2200 RM [Rack Mount] was easy to set up. The [UPS] and its PowerAlert software supply efficient and continuous power to systems and save you time and money. For protection against unstable electricity, consider the Smart 2200 RM UPS and PowerAlert." (August, 1998 - *WindowsNT Magazine* Reviewing Smart 2200 RM UPS System)

"[The PowerVerter] worked flawlessly. I booted up the laptop and worked away with no fear of losing power. The PowerVerter is one of those products that I've been looking for for years." (Tech Edition, 1998 - *Inc. Magazine* Reviewing PV 140 and 300 Ultra-Compact Inverters)

"The models provide more extended runtime to support mission-critical equipment in network and telecommunications environments. The units feature four LAN ports for simultaneous multiple server monitoring and shutdown – even if the servers are running different operating systems. They also feature hot-swappable batteries (for safe and convenient replacement while providing AC power) and expandable [batteries] (to accommodate growing systems)." (April 28, 1998 - *Windows Magazine* Reviewing SmartPro DataCenter UPS Systems)

# Other Products

- ◆ **MCG AC Line, Data Line, PLC, and other Surge Protection Products** – Protect all your equipment for every application!
- ◆ **Summit Technology, Inc. PowerSight® 3000 Energy Analyzer** – The smallest, most cost effective measurement instrument available!
- ◆ **Veris Industries, Inc. Alta Labs™ Environmental Sensors and Hawkeye® Power Monitoring Sensors** – Innovative and quality energy monitoring solutions!
- ◆ **Energy Data Program** – An affordable and easy software program to manage utility costs and consumption!

Stand-by UPS Systems

On-line UPS Systems

PowerAlert Software

Laptop Power Accessories

Isolation Transformers

Line Conditioners

And More

The Reliability Leader in UPS  
Protection!

### PROBLEM:

Computers, Servers, Systems, and Equipment shut down when the power goes out which results in downtime and loss in productivity.

### SOLUTION:

Install a Battery Backup or UPS System (UPS) to protect and ensure that your computers, servers, systems, and equipment continue to run even when the power is out.

### Uptime, Not Downtime

**TRIPP LITE** Battery Backups keep your equipment running even when the power goes out! With a **TRIPP LITE** Uninterruptible Power Supply, also called a battery backup, you won't have to worry the next time your power goes out. You won't be kicking yourself for forgetting to save the file you were working on, or trying to figure out how much it cost your company when your systems shut down, or wondering if the server will reset properly when the power comes back on. **TRIPP LITE** UPS systems will ensure that your systems and equipment will continue to stay on even when the power is not, so that you can continue to work or properly shut down your systems in the event of a prolonged power outage.

### Protection

Not only do you get extended runtime with **Tripp Lite** UPS systems, you also get superior protection! Because they have built in surge suppression and automatically "boost" or "cut" incoming voltage (select models), they make certain that you have constant, consistent, reliable power. **Damage to equipment from surges, sags, and line noise will cease!**

### Intelligent Software

**Tripp Lite's PowerAlert** software is the only UPS software that can manage **any brand** and **any type of UPS systems**. And in the event of a blackout, it automatically saves and shuts down any Windows-based applications running from the server or PC. The **PowerAlert** software comes **FREE** with most UPS system purchases.

## Why Tripp Lite?

- ✓ **Over 75 Years of Manufacturing Excellence** - Reliability
- ✓ **ISO 9000 Certified** - Quality
- ✓ **UPS Systems for Every Application** - *There's one for everyone's need*
- ✓ **FREE PowerAlert Software\*** - *Manages all brands and types of UPS systems*
- ✓ **Convenient Battery Replacement Doors\*** - *No need for a technician*
- ✓ **Hot-Swappable Batteries\*** - *100% uptime*
- ✓ **Status Indicators** - *Lets you know the status of your unit*
- ✓ **Audible Alarm** - *Lets you know when there are power problems*
- ✓ **Smart Outlet Spacing** - *Transformers do not cover up needed outlets*
- ✓ **Built in Modem/Fax Line Protection\*** - *Protect AC lines and phone lines*
- ✓ **Line Interactive\*** - *Provides consistent, stable voltage*
- ✓ **True Sine-wave Output/Continuous On-line Protection\*** - *Isolates sensitive equipment against power problems on your AC line*
- ✓ **Multiple Server Support\*** - *Manage up to four servers simultaneously*
- ✓ **Up to \$75,000 in Lifetime Insurance\*** - *Guaranteed protection*
